Part 1: TAPTRANS Confirmation Layout

Introduction

Following are the definitions of the Confirmation Data File records. This is also referred to as the Response File. There are thirteen different record definitions:

Record	Definition
RECORD AREA	The Record Area is optional, and can only be received if the accepted detail option is used. The records are only produced when the option is selected and there are passenger itinerary addenda on the TAPTRANS input file.
FILLER RECORD	The Filler Record is a redefinition of the TAPTRANS CUST-RECORD-AREA.
HEADER RECORD	One Header Record is produced per merchant batch on the tape deposit. This is created for every batch that was processed by a TAPTRANS run. It is produced for every TAPTRANS transmission or tape processed that desire the confirmation file.
TRAILER RECORD	One Trailer Record is present on each file. The record contains the count of transaction items and amounts received and processed on the monetary confirmation file.
NON-MON TRAILER RECORD	The Non-Mon Trailer Record is based on the sum of all transaction records on the batch trailer records for all monetary batches that meet the selection criteria to be included on this transaction.
ACCEPTED TOTAL RECORD	There is one Accepted Total Record per file produced for the monetary (TAPTRANS input file). One is present on each file. The record contains the count of transaction items and amounts received and processed on the monetary confirmation file.
REJECTED DETAIL ITEM FILE	The Rejected Detail Item File record mirrors the input transaction and the reject codes. This record is produced for every detail item that rejects from a TAPTRANS transmission or tape. The rejects will be in front of the batch record that they were in on the data file.

Record	Definition
CHARGEBACK RECORD	The Chargeback Record identifies the reason the ticket is being charged back. Refer to the <i>Chargebacks</i> manual for a complete listing of valid codes.
RETRIEVAL RECORD	The Retrieval Record identifies why the retrieval of the cardholder ticket was requested. Refer to the <i>Retrievals</i> manual for a complete listing of valid codes.
DETAIL RECORD1	Record Detail1 contains the basic transaction data for each accepted detail on the TAPTRANS file. It also contains TIIF/MERIT discount related data if it applies to the particular transaction. This field is optional, and can only be received if the accepted detail option is used.
RECORD DETAIL2	Record Detail2 contains the accepted CPS/IC comply addenda record. It will contain PS2000/IC compliance data. This record is optional and can only be received if the accepted detail option is used. The records will only be produced when the option is selected and there are passenger itinerary addenda on the TAPTRANS input file.
RECORD DETAIL3	Record Detail3 will contain airline itinerary data for MasterCard or VISA airline transactions. This record is optional and can only be received if the accepted detail option above is used. The records will only be produced when the option is selected and there are passenger itinerary addenda on the TAPTRANS input file.
RECORD DETAIL4	Record Detail4 is optional, and can only be received if the accepted detail option is used. The records will only be produced when the option is selected and there are passenger itinerary addenda on the TAPTRANS input file.

Record	Definition
--------	------------

Note

This copybook contains 21 bytes at the end of each record.

- ◆ GROUP-ID
- ◆ SORT-SYSTEM
- ◆ SORT-PRIN
- ◆ SORT-AGENT
- ◆ SEQUENCE-NO

Please ignore these bytes. They are for internal First Data use only.

Record Area

From	To	Field	Length	Picture
1	240	CUST-RECORD-AREA	240	GROUP
1	1	CUST-RECORD-TYPE	1	X
<p>Business Name: Confirmation Files Record Type Code</p> <p>Valid values are:</p> <p>A = Accepted Totals Record. One will be produced per merchant batch on the tape deposit. This will be created for every batch that was processed by a TAPTRANS run. It is produced for every transmission or tape processed that desires the confirmation file.</p> <p>H = File Header. One per file produced for monetary (TAPTRANS input file).</p> <p>R = Reject Record. It will mirror the input transaction and the reject codes. This record will be produced for every detail that rejects from a TAPTRANS transmission or tape. The rejects will be in front of the batch record that they were in on the data file.</p> <p>T = File Transfer. One will be present on each file. The record will contain the count of transaction items and amounts received and processed on the monetary confirmation file.</p>

<p>Default value is:</p> <p>Spaces</p>				
3	89	FILLER	87	X(87)
<p>Valid values are:</p> <p>Spaces</p>				

From	To	Field	Length	Picture
90	90	CUST-CHGBK-ADJ-IND	1	X
		Business Name: Chargeback/Adjustment Indicator Code		
		Valid values are: A = Normal adjustment C = Chargeback adjustment		
91	239	FILLER	149	X(149)
		Valid values are: Spaces		

From	To	Field	Length	Picture
240	240	CUST-ACCEPTED-REC-IND	1	X

Business Name: Confirmation Files Record Identifier

Valid values are:

D1 = Accepted Detail Record. It will contain the basic transaction data for each accepted detail on the TRAPTRANS file. It will also contain TIIF/MERIT discount related data if it applies to the particular transaction. If the transaction is a foreign currency transaction, it will contain the foreign transaction amount and country code.

Note

This type of record is optional and must be requested in order to be received. The default is to not produce accepted detail records.

D2 = Accepted CPS/IC Comply Addenda Record. It will contain PS2000/IC compliance data. (TRAPTRANS addenda, CPS/IC addenda or IC Comply addenda records).

Note

This record is optional and can only be received if the Accepted Detail option is used. The records will only be produced when the option is selected and there are accepted CPS/IC Comply Addenda records on the TAPTRANS input file.

D3 = Accepted Airline Addenda Record. It will contain airline itinerary data for MasterCard or VISA airline transactions.

Note

This record is optional and can only be received if the Accepted Detail option is used. The records will only be produced when the option is selected and there are passenger itinerary addenda on the TAPTRANS input file.

Filler Record

From	To	Field	Length	Picture
1	89	CUST-FILLER	89	GROUP
		Business Name: Customer Record Area		
1	44	FILLER	44	X(44)
45	48	CUST-ORIG-TRAN-DATE	4	S9(7)V C-3
		Business Name: Transaction Date		
		The date that the transaction occurred.		
49	52	CUST-ORIG-POST-DATE	4	S9(7)V C-3
		Business Name: Transaction Original Post Date		
		During the account transfer process, details are transferred to the new account. This is the date a transferred detail posted to the original account.		
53	85	FILLER	33	X(30)
86	89	CUST-ADJ-POST-DATE	4	S9(7)V C-3
		The date the adjustment transaction posted.		
		Format is: MMDDYY		

Header Record

From	To	Field	Length	Picture
1	240	CUST-HEADER-RECORD	240	GROUP
1	1	CUST-HR-RECORD-TYPE	1	X
Business Name: Confirmation Files Record Type Code Valid value is: H = File Header One per file produced for the Monetary (TRAPTRANS) input file.				
2	6	FILLER	5	X(5)
Valid values are: Spaces				
7	14	CUST-HR-SYSTEM-DATE	8	X(8)
Business Name: File Creation FDR System Date. First Data System date when the file was created Format is: MM/DD/YY Default value is: Spaces				
15	19	FILLER	5	X(5)
Valid values are: Spaces				

From	To	Field	Length	Picture
20	25	CUST-HR-SYSTEM-TIME	6	9(6)
		Business Name: File Creation FDR System Time.		
		First Data System time when the file was created		
		Format is:		
		HHMMSS		
		Default value is:		
		Spaces		
26	30	FILLER	5	X(5)
		Valid values are:		
		Spaces		
31	38	CUST-HR-PROCESS-DATE	8	X(8)
		Business Name: System FDR Processing Date		
		First Data processing date when the transactions were posted		
		Format is:		
		MM/DD/YY		
		Default value is:		
		Spaces		
39	43	FILLER	5	X(5)
		Valid values are:		
		Spaces		

From	To	Field	Length	Picture
44	46	CUST-HR-TRANS-ID	3	X(3)
Business Name: Transaction Source Identification Code				
Code used by First Data representing the institution that assigned the transaction identifier and whether the transaction qualified for the Visa Custom Payment Service (CPS) interchange program				
Valid values are:				
004 = Visa-assigned transaction identifier				
009 = First Data-assigned transaction identifier				
014 = Visa-assigned transaction identifier				
019 = First Data-assigned transaction identifier				
Default value is:				
Spaces				
47	240	FILLER	194	X(194)
Valid values are:				
Spaces				

Trailer Record

From	To	Field	Length	Picture
1	240	CUST-TRAILER-RECORD	240	GROUP
1	1	CUST-TR-RECORD-TYPE	1	X
		Business Name: Confirmation Files Layout Record Type Code		
		Valid value is: T = File Trailer		
		One will be present on each file. The record will contain the count of transaction items and amounts received and processed on the monetary confirmation file.		
2	6	FILLER	5	X(5)
		Valid values are: Spaces		
7	14	CUST-TR-SYSTEM-DATE	8	X(8)
		Business Name: File Creation FDR System Date		
		First Data system date when the file was created. This date will match the date in the file header.		
		Default value is: Spaces		
		Format is: MM/DD/YY		
15	19	FILLER	5	X(5)
		Valid values are: Spaces		

From	To	Field	Length	Picture
20	25	CUST-TR-SYSTEM-TIME	6	9(6)
Business Name: File Creation FDR System Time First Data system time when the file was created. This time will match the time in the file header. Default value is: Zeroes Format is: HHMMSS				
26	30	FILLER	5	X(5)
Valid values are: Spaces				
31	38	CUST-TR-PROCESS-DATE	8	X(8)
Business Name: System FDR Processing Date The First Data processing date on which the items will be processed. This date will match the First Data process date in the file header. Format is: MM/DD/YY Default value is: Spaces				
39	43	FILLER	5	X(5)
Valid values are: Spaces				

From	To	Field	Length	Picture
44	46	CUST-TR-TRANS-ID	3	X(3)
<p>Business Name: Transaction Source Identification Code</p> <p>Code used by First Data representing the institution that assigned the transaction identifier and whether the transaction qualified for the Visa Custom Payment Service (CPS) interchange program</p> <p>This code will match the transmission ID from the file header record.</p> <p>Valid values are:</p> <p>004 = Visa-assigned transaction identifier</p> <p>009 = First Data-assigned transaction identifier</p> <p>014 = Visa-assigned transaction identifier</p> <p>019 = First Data-assigned transaction identifier</p> <p>Default value is:</p> <p>Spaces</p>				
47	51	FILLER	5	X(5)
<p>Valid values are:</p> <p>Spaces</p>				

From	To	Field	Length	Picture
52	60	CUST-TR-TOTAL-ACCEPT	9	9(9)
Business Name: Confirmation Files Detail Item Total Accept Count A count of all detail items that have been accepted. It will also include any addenda records that generate a separate zero dollar detail record (description addenda, department code addenda, and foreign currency addenda). Default value is: Zeroes Note This is the same logic used in the input TAPTRANS file.				
61	62	FILLER	2	X(2)
Valid values are: Spaces				
63	79	CUST-TR-TOTAL-ACCEPT-AMT	17	S9(15)V99
Business Name: Confirmation Files Detail Item Total Accept Amount The net total amount of all accepted transactions. (Sales plus cash advances minus returns). Payments will be in their own separate monetary letter and will always be negative in sign. Default value is: Zeroes				
80	81	FILLER	2	X(2)
Valid values are: Spaces				

From	To	Field	Length	Picture
82	90	CUST-TR-TOTAL-ORIGINAL	9	9(9)
Business Name: Confirmation Files Original Transactions Sent Total Count The total number of transactions sent in on the input tape. This field is based on the sum of all transaction counts on the Batch Trailer records for all monetary batches that meet the selection criteria to be included in this transmission. Default value is: Zeroes				
91	92	FILLER	2	X(2)
Valid values are: Spaces				
93	109	CUST-TR-TOTAL-ORIGINAL-AMT	17	S9(15)V99
Business Name: Confirmation File Original Transactions Sent Total Amount Total net amount of transactions sent in on the input tape. This field is based on the sum of all transaction amounts on the Batch Trailer records for all monetary batches that meet the selection criteria to be included on this transmission. Default value is: Zeroes				
110	111	FILLER	2	X(2)
112	120	CUST-TR-ALPH-TOTL-CT	9	X(9)
Business Name: Trailer Record Total Count Total of entered counts from the TAPTRANS batches Default value is: Zeroes				

From	To	Field	Length	Picture
112	120	FILLER	9	GROUP
		Redefines CUST-TR-ALPH-TOTL-CT		
112	120	CUST-TR-ENTR-TOTL-CT	9	S9(9)
		Business Name: Trailer Record Total Count		
		Total of entered counts from the TAPTRANS batches		
		Default value is:		
		Zeroes		
121	122	FILLER	2	X(2)
123	139	CUST-TR-ALPH-TOTL-AM	17	X(17)
		Business Name: Trailer Record Total Amount		
		Total of entered amounts from the TAPTRANS batches		
		Default value is:		
		Zeroes		
123	139	FILLER	17	GROUP
		Redefines CUST-TR-ALPH-TOTL-AM		
123	139	CUST-TR-ENTR-TOTL-AM	17	S9(15)V99
		Business Name: Trailer Record Total Amount		
		Total of entered amounts from the TAPTRANS batches		
		Default value is:		
		Zeroes		
140	240	FILLER	101	X(101)
		Valid values are:		
		Spaces		

Non-Mon Trailer Record

From	To	Field	Length	Picture
1	240	CUST-NON-MON-TRAILER-RECORD	240	GROUP
1	1	FILLER Valid value is: T	1	X
2	6	FILLER Valid values are: Spaces	5	X(5)
7	14	CUST-NTR-SYSTEM-DATE First Data System date the file was created. Default value is: Spaces	8	X(8)
15	19	FILLER Valid values are: Spaces	5	X(5)
20	25	CUST-NTR-SYSTEM-TIME First Data System date the file was created. Default value is: Zeroes	6	9(6)
26	30	FILLER Valid values are: Spaces	5	X(5)

From	To	Field	Length	Picture
31	38	CUST-NTR-PROCESS-DATE	8	X(8)
		The First Data processing date the items will be processed. Valid values are: Default value is: Spaces Format is: MM/YY/DD		
39	51	FILLER	13	X(13)
		Valid values are: Spaces		
52	60	CUST-NTR-TOTAL-ITEMS	9	9(9)
		Business Name: Confirmation Files Total Original Transactions Sent Count The total number of transactions sent on the input tape. This field is based on the sum of all transaction counts on the Batch Trailer records for all monetary batches that meet the selection criteria to be included in this transmission. Default value is: Zeroes		
61	62	FILLER	2	X(2)
		Valid values are: Spaces		

From	To	Field	Length	Picture
63	79	CUST-NTR-TOTAL-ITEM-AMOUNT	17	S9(15)V99
Business Name: Confirmation Files Total Original Transactions Sent Amount				
Total net amount of transaction sent on the input tape. This field is based on the sum of all transaction amounts on the Batch Trailer records for all monetary batches that meet the selection criteria to be included on this transaction.				
Default value is: Zeroes				
80	240	FILLER	161	X(161)
Valid values are: Spaces				

Accepted Totals Record

From	To	Field	Length	Picture
1	240	CUST-ACCEPTED-RECORD	240	GROUP
1	6	CUST-AR-ACCEPT-DATE	6	9(6)
		<p>This is the First Data process date. It is the date that accepted items would process through the First Data System.</p> <p>Default value is:</p> <p>Zeroes</p>		
7	11	FILLER	5	X(5)
		<p>Valid values are:</p> <p>Spaces</p>		
12	17	CUST-AR-ACCEPT-NUMBER	6	9(6)
		<p>The number of transactions that were accepted when the merchant batch was processed. This includes detail records and addenda records that generate a zero dollar detail item (description addenda, department code addenda, and foreign currency addenda). This is the same accumulation done for the input monetary tape batches.</p> <p>Default value is:</p> <p>Spaces</p>		
18	22	FILLER	5	X(5)
		<p>Valid values are:</p> <p>Spaces</p>		

From	To	Field	Length	Picture
23	39	CUST-AR-ACCEPT-AMOUNT	17	S9(15)V99
		<p>The net amount of transactions that were accepted when the merchant batch was processed. This is determined by adding sales and cash advance amounts and subtracting returns from this. Payments would be in a separate batch and would be negative.</p> <p>Default value is: Zeroes</p>		
40	44	FILLER	5	X(5)
		<p>Valid values are: Spaces</p>		
45	60	CUST-AR-MERCHANT-NUMBER	16	X(16)
		<p>The merchant number from the batch records</p> <p>Default value is: Spaces</p>		
61	65	FILLER	5	X(5)
		<p>Valid values are: Spaces</p>		
66	72	CUST-AR-ORIGINAL-NUMBER	7	9(7)
		<p>The original count of transactions from the input batch trailer record.</p> <p>Default value is: Zeroes</p>		
73	77	FILLER	5	X(5)
		<p>Valid values are: Spaces</p>		

From	To	Field	Length	Picture
78	94	CUST-AR-ORIGINAL-AMOUNT	17	S9(15)V99
		The original net amount of transactions from the input batch trailer record. Default value is: Zeroes		
95	99	FILLER	5	X(5)
		Valid values are: Spaces		
100	102	CUST-AR-TRANS-ID	3	X(3)
		The transmission ID from the monetary tape file. Default value is: Spaces		
103	104	FILLER	2	X(2)
		Valid values are: Spaces		
105	105	CUST-AR-ACTUAL-BATCH-FLAG	1	X
		This indicates that the batch is an original batch that was sent in or was split because it had more than 2000 items in it. Valid values are: Y = An actual batch Space = Batch that was system created The last batch in a batch that was split will have the flag set to a Y. The last batch will also contain the original count of transactions and net amount of transactions that was sent in on the batch trailer record. These fields will be zero filled on the system created batches. Default value is: Spaces		

From	To	Field	Length	Picture
106	113	CUST-AR-BATCH-NO First Data assigned merchant batch number. Default value is: Zeroes	8	9(8)
114	114	FILLER Valid values are: Spaces	1	X
115	118	CUST-AR-SYSTEM The monetary letter (merchant) system number under which the accepted batch was submitted. Default value is: Spaces	4	X(4)
119	122	CUST-AR-PRIN The monetary letter (merchant) principal bank number under which the accepted batch was submitted. Default value is: Spaces	4	X(4)
123	124	FILLER	2	X(2)
125	131	CUST-AR-ALPH-BTCH-TOTL-CT Business Name: Batch Total Count Entered count on the TAPTRANS file sent before modifications Default value is: Zeroes	7	X(7)
125	131	FILLER Redefines CUST-AR-ALPH-BTCH-TOTL-CT	7	GROUP

From	To	Field	Length	Picture
125	131	CUST-AR-ENTR-BTCH-TOTL-CT	7	S9(7)
		Business Name: Batch Total Count		
		Entered count on the TAPTRANS file sent before modifications		
		Default value is:		
		Zeroes		
132	133	FILLER	2	X(2)
134	150	CUST-AR-ALPH-BTCH-TOTL-AM	17	X(17)
		Business Name: Batch Total Amount		
		Entered amount on the TAPTRANS file sent before modifications		
		Default value is:		
		Zeroes		
134	150	FILLER	17	GROUP
		Redefines CUST-AR-ALPH-BTCH-TOTL-AM		
134	150	CUST-AR-ENTR-BTCH-TOTL-AM	17	S9(15)V99
		Business Name: Batch Total Amount		
		Entered amount on the TAPTRANS file sent before modifications		
		Default value is:		
		Zeroes

106	125	CUST-RR-BATCH-REJECTS	20	X(20)

Business Name: Batch Reject Error Text

This field is made up of 20 individual single-byte fields. Each is an indicator for a specific type of error. If the byte is a space, the item passed those edits. If the byte contains an X, the item was in error for that reason.

The error conditions are listed in order (left-justified) below.

Valid values are:

Pos. 1 = Merchant number not on file

Pos. 2 = Duplicate batch

Pos. 3 = Duplicate batch on same file

Pos. 4 = Currency code mismatch

Pos. 5 = Merchant number on the batch header record doesn't have the same system and principal bank affiliation as the bank header record

Pos. 6 = Invalid merchant number

Pos. 7 = Invalid format for an First Data retail service customer

Pos. 8 = No batch trailer record present
Pos. 8 = No batch trailer record present

Pos. 9 = Non numeric detail count on the batch trailer record

Pos. 10 = Invalid detail count on the batch trailer record. It doesn't match the calculated count

Pos. 11 = Net amount not numeric

Continued next page . . .

From	To	Field	Length	Picture
		Continued from previous page . . .		
		Pos. 12 = Invalid net amount. The trailer batch amount doesn't match the calculated batch amount		
		Pos. 13 = The batch header and trailer do not have the same merchant number		
		Pos. 14 = Net amount exceeds maximum		
		Pos. 15 = Reserved for future use		
		Pos. 16 = Invalid merchant media		
		Pos. 17 = Maximum amount exceeded		
		Pos. 18 = Invalid discount method		
		Pos. 19 = Reserved for future use		
		Pos. 20 = Reserved for future use		
		Default value is:		
		Spaces		
126	150	CUST-RR-DETAIL-REJECTS	25	X(25)
		Business Name: Detail Reject Error Text		
		This field is made up of 25 individual single-byte fields. Each is an indicator for a specific type of error. If the byte is a space the item passed those edits. If the byte contains an X, the item was in error for that reason.		
		The error conditions are listed in order (left-justified) below.		
		Valid values are:		
		Pos. 1 = Invalid cardholder account number.		
		Pos. 2 = This merchant cannot deposit cardholder accounts. For example, a private label cardholder in a VISA merchant deposit.

Part 2: Chargeback/Adjustment Confirmation Layout

Introduction

Following is the definition of the Confirmation Data File record.

This file contains records created from the monetary adjustments that are posted to merchants. There are two general types of adjustments that can be included and/or excluded.

- Chargeback adjustments - produced when the bank posts a chargeback to the merchant
- Normal adjustments - any miscellaneous adjustments posted to the merchant
- There are three different record definitions:
- File Header - One per customer, file produced
- File Trailer - One present on each file - record contains number of items in the file and their total dollar amount.
- Chargeback/Adjustment Record - record contains data about chargebacks posted to the merchant - contained on a separate file created during cycle. This record will also be used for other merchant adjustments, if that option is selected.

Note

This file is available by program request only, and is restricted to selection by merchant system/prin/agent.

Chargebacks that are posted to the merchant are only one type of adjustment transaction. This file can be obtained for all adjustments that affect a merchant, or for just chargebacks.

67	71	CUST-CR-ADJ-ORIG-BATCH	5	X(5)
Business Name: Batch Number Number representing a grouping of transactions that are processed together Default value is: Spaces				
72	82	CUST-CR-ADJ-LOC-BOX-BATCH	11	GROUP
Adjustment transaction reference number locator, filmbox, and batch. This will be present on all transactions.				
72	74	CUST-CR-ADJ-LOCATOR	3	X(3)
Business Name: Merchant Locator Identifier This field is a constant 980 for ETC processing. Batch authorization processing is used as a three-digit locator code assigned by First Data Customer Service when the Authorization Type (tape header, position 10) is set to P or an F. This field is used in the reference number. Valid values are: 000 - 399 Default value is: Spaces If merchant non-monetary transaction 092 is used for this merchant, this portion of the reference number will be overlaid by the First Data System, and will be in the 400-699 ranges by TAPTRANS processing.				

From	To	Field	Length	Picture
75	77	CUST-CR-ADJ-FILMBOX	3	X(3)
		Business Name: Microfilm Box Number. Three-position microfilm box number in which the ticket is located Default value is: Spaces		
78	82	CUST-CR-ADJ-BATCH	5	X(5)
		Business Name: Batch Number Number representing a grouping of transactions that are processed together Default value is: Spaces		
83	89	CUST-CR-TRAN-AMOUNT	7	S9(11)V99 C-3
		Business Name: Transaction Amount This will be the net effect of the adjustment since an adjustment can be used to adjust a transaction amount. On adjustments that are used to change a transaction amount, the original transaction amount will be used to determine the effect of the adjustment. Default value is: Zero		
90	91	CUST-CR-CB-REASON	2	S9(3)V C-3
		Business Name: Chargeback Reason Code Identifies the reason the ticket is being charged back. Refer to the <i>Chargeback</i> manual for a complete listing of valid codes. Default value is: Zeroes		

From	To	Field	Length	Picture
92	93	CUST-CR-ADJ-TRAN-CODE	2	S9(3)V C-3
		Business Name: Adjustment Transaction Code		
		Code determining the type of monetary transaction entered to post the adjustment		
		Valid values are:		
		Refer to the <i>Adjustments</i> manual for a complete list of valid codes.		
		Default value is:		
		Zeroes		
94	97	CUST-CR-ADJ-POST-DATE	4	S9(7)V C-3
		Business Name: Post Date		
		Day, month, year the original transaction was added to this account		
		Format is:		
		MMDDYY		
		Default value is:		
		Zero		
98	98	CUST-CR-CHGBK-ADJ-IND	1	X
		Business Name: Chargeback Adjustment Indicator Code		
		Code determining the type of chargeback transaction		
		A = Normal adjustment		
		C = Chargeback adjustment		
		Default value is:		
		Space		

From	To	Field	Length	Picture
99	121	CUST-CR-CB-ORIG-REF-NO	23	X(23)
Business Name: Chargeback Reference Number				
System-assigned unique sequence number identifying the chargeback.				
Default value is:				
Spaces				
Note				
This unique number is permanently assigned to each specific chargeback.				
122	240	FILLER	119	X(119)
Valid values are:				
Spaces				

Part 3: Retrieval Confirmation Layout

Introduction

The following is the definition of the new confirmation data file records:

This file will contain merchant retrieval items where the items are either new today, or have had either the acquiring or issuing statuses changed.

There are three different record definitions:

- File Header – One per customer file produced.
- File Trailer – One will be present on each file. The record will contain the number of items in the file and their total dollar amount
- Retrieval Record – It will contain data about retrieval requests for merchants. The records will be on a separate file created during cycle. The file will contain a header and trailer record, as well as retrieval records. This file is available by program request only, and is restricted to selection by merchant system/prin/agent if the merchant has used the Non-Mon 92 variable locator option, or was an ETC merchant. If the above option is not used, the activity can be selected by merchant system and locator number only.

Record Layout

From	To	Field	Length	Picture
1	240	CUST-HEADER-RECORD	240	GROUP
1	1	CUST-HR-RECORD-TYPE	1	X
		Business Name: Confirmation Files Record Type Code		
		Valid value is: H = File Header One per file produced for the Monetary (TRAPTRANS) input file.		
2	6	FILLER	5	X(5)
		Valid values are: Spaces		
7	14	CUST-HR-SYSTEM-DATE	8	X(8)
		Business Name: File Creation FDR System Date.		
		First Data System date when the file was created		
		Format is: MM/DD/YY		
		Default value is: Spaces		
15	19	FILLER	5	X(5)
		Valid values are: Spaces

Retrieval Record

From	To	Field	Length	Picture
1	240	CUST-RETRIEVAL-RECORD	240	GROUP
1	6	CUST-RTR-ACQUIRE-ICA-BIN	6	X(6)
		The ICA BIN number of the acquirer's financial institution. Default value is: Spaces		
7	12	CUST-RTR-ISSUING-ICA-BIN	6	X(6)
		The ICA BIN number of the issuer. Default value is: Spaces		
13	35	CUST-RTR-REFERENCE-NO	23	X(23)
		The number which identifies the item for which the retrieval was requested. Default value is: Spaces		
36	51	CUST-RTR-MERCHANT-ACCT-NO	16	X(16)
		Business Name: Merchant Account 16 Number The unique number identifying the merchant account. Default value is: Spaces		

From	To	Field	Length	Picture
52	75	CUST-RTR-CARDHOLDER-ACCT-NO	24	X(24)
Business Name: Card Account 24 Identifier Unique number identifying the cardholder account For an account with duality, there could be a MasterCard number and a Visa number associated with the same account. Default value is: Spaces				
76	76	CUST-RTR-TYPE-ITEM-REQUESTED	1	9
Business Name: Retrieval Type Code This is the type of retrieval request. Valid values are: For VISA and MasterCard: 1 = Original ticket 2 = Photocopy of ticket For MasterCard only: 3 = Automated teller machine (ATM) copy 4 = Facsimile of ticket 5 = Image 6 = Image of an agreement (car rental) For VISA: 1 = Original ticket 2 = Photocopy of ticket Default value is: Zero				
77	77	FILLER	1	X
Default value is: Space				

From	To	Field	Length	Picture
78	79	CUST-RTR-REASON-CODE	2	X(2)
Business Name: Retrieval Reason Code Code representing the reason a retrieval request was submitted Valid values are: Refer to the Tables section of the <i>Retrievals</i> manual for a complete listing of valid codes. Default value is: Zeroes				
80	92	CUST-RTR-TRANS-AMOUNT	13	S9(11)V99
Business Name: Transaction Amount Amount of the exchange or transfer of goods, services, or funds Default value is: Zeroes				
93	98	CUST-RTR-TRANS-DATE	6	9(6)
Business Name: Transaction Date Date the transaction occurred Default value is: Zeroes				
99	104	CUST-RTR-POST-DATE	6	9(6)
Business Name: Post Date Date the original transaction was added to this account. Default value is: Zeroes				

From	To	Field	Length	Picture
105	110	CUST-RTR-REQUEST-DATE	6	9(6)
		Business Name: Retrieval Request Date		
		Date the retrieval request was entered into the System		
		Default value is:		
		Zeroes		
111	112	CUST-RTR-REJECT-CODE	2	S9(2)
		Business Name: Retrieval Request Reject Code		
		Code determining the reason a retrieval request was rejected		
		Valid values are:		
		01 = Invalid reference number		
		02 = Zero dollar amount		
		03 = Invalid transaction date		
		04 = Invalid posting/statement date		
		05 = Invalid cardholder number		
		06 = Invalid information		
		07 = Reject – Duplicate request		
		08 = QPS – Under floor limit		
		Default value is:		
		Zeroes		
113	123	CUST-RTR-ACQUIRE-STATUS	11	GROUP

From	To	Field	Length	Picture
113	114	CUST-RTR-ACQ-FINAL-STAT	2	S9(2)
		Business Name: Retrieval Acquiring Status Code		
		Code determining the final system status of the retrieval		
		Refer to the Tables section of the <i>Retrievals</i> manual for a complete listing of valid codes.		
		Default value is:		
		Zeroes		
115	120	CUST-RTR-ACQ-FINAL-STAT-DATE	6	9(6)
		Business Name: Retrieval Acquirer Final Status Date		
		Date the acquirer's final status was set on the Cardholder Master File		
		Default value is:		
		Zeroes		
121	123	CUST-RTR-ACQ-FINAL-STAT-OP-CD	3	X(3)
		Business Name: Retrieval Acquirer Final Status User Identifier		
		Identifier of the individual who made the most recent modification to the acquiring final status for a retrieval		
		Default value is:		
		Spaces		
124	134	CUST-RTR-ACQUIRE-KEY	11	GROUP

From	To	Field	Length	Picture
124	124	CUST-RTR-ACQ-KEY-TYPE	1	9
		Business Name: Retrieval Acquirer Request Type Code		
		Code identifying the type of request		
		Valid values are:		
		0 = In-house photocopy request		
		1 = In-house hardcopy request		
		2 = External request to be found by First Data. RIP's and First Data Tape depositing merchants use this request.		
		3 = External requests to be found by VISA or MasterCard.		
		Default value is:		
		Zero		
125	129	CUST-RTR-ACQ-KEY-JULIAN	5	S9(5)
		Business Name: Retrieval Acquirer Request Julian Date		
		Request date		
		Format is:		
		YYJJJ		
		Default value is:		
		Zeroes		
130	134	CUST-RTR-ACQ-KEY-SEQ-NO	5	S9(5)
		Business Name: Retrieval Acquirer Request Sequence Number		
		Number identifying where the item occurred on the request date within the type of request.		
		Default value is:		
		Zeroes		
135	145	CUST-RTR-ISSUING-STATUS	11	GROUP

From	To	Field	Length	Picture
135	136	CUST-RTR-ISS-FINAL-STAT	2	S9(2)
		Business Name: Issuing System Status Code		
		Code determining the most recent status set by the issuer		
		Valid values are:		
		Refer to the Tables section of the <i>Retrievals</i> manual for a complete listing of valid codes.		
		Default value is:		
		Zeroes		
137	142	CUST-RTR-ISS-FINAL-STAT-DATE	6	9(6)
		Business Name: Retrieval Issuing Final Status Date		
		Date the issuer's final status was set on the Cardholder Master File.		
		Default value is:		
		Zeroes		
143	145	CUST-RTR-ISS-FINAL-STAT-OP-CD	3	X(3)
		Business Name: Retrieval Issuer Final Status User Identifier
